Basis for Interim Operations, 207B Pond Sludge

Steve R. Keith, Program Director  
Solar Pond Projects  
EG&G Rocky Flats Inc.

000021215

The RFO Environmental Safety and Health has completed a technical review of the subject document and concurs with EG&G's hazards analysis. As stated in the attachment, the hazards from the sludge storage are within the safety envelope presented in the Draft Final Safety Analysis Report for the 750/904 Pads.

Due to the fact that this is a Category III operation and will result in a reduction of risk to the public, RFO Environmental Restoration hereby grants approval for the Basis for Interim Operations for removal of pond sludge by vacuum truck and storage in tanks on the 750 Pad.

If you have any further questions, please contact Steve Howard at extension 3040.
